What is a mobile water treatment system?

Mobile solutions use our Actiflo[®], Hydrotech Discfilter(TM), reverse osmosis, ion exchange and multimedia filtration technologies, delivered through trailers, containers and skid-mounted systems. Mobile water treatment systems offer a cost-effective alternative to fixed plants across many industrial environments.

Why should you choose a mobile water treatment system?

Mobile water treatment systems delivered to your site, whenever you need them. Veolia offers reliable, secure, 24/7 services to suit all requirements. Pre-packaged on a trailer, skid, or container for maximum mobility and responsiveness, a portable water treatment plant will instantly enhance your facility.

Does a mobile treatment unit need a follow-up treatment?

The mobile treatment units perform primary water treatment steps. This means that the water still needs a follow-up treatment after it has left the units. The follow-up treatment is determined by the function that the water will have. When water is purified in a mobile treatment unit it does not need preliminary treatment.

Does a mobile water treatment unit need preliminary treatment?

When water is purified in a mobile treatment unit it does not need preliminary treatment. The mobile water treatment units do have the opportunity to conduct preliminary water treatment themselves. The systems are very complete. The only things that our customer will need to add to the system are power, water connections and sewer connections.

Aqua Zone has one of the largest fleets of emergency water treatment equipment, ranging from sea water and brackish water desalination plants, filtration plants, wastewater plant, chemical ...
