Can solar-powered water pumping systems be used in Nepal?

In Nepal's Gandaki Province, the solar-powered pumping system proved to be a more cost-effective and suitable alternative to electricity-based water pumping systems. The potential applicability of this successful solar pumping system can therefore be assessed for Nepal's hilly terrain [.,].

Are solar-powered water pumping systems better than electricity-based water pumps?

In contrast, conventional water pumping systems, reliant on electricity, contribute to noise pollution and generate air pollution. In Nepal's Gandaki Province, the solar-powered pumping system proved to be a more cost-effective and suitable alternative to electricity-based water pumping systems.

Can a diesel pump be used in Nepal?

Diesel pumps are commonly used in Nepal, particularly in areas characterized by a low head difference. The Operation and Maintenance (O&M) cost of a diesel pump is 2-4 times higher than that of a solar photovoltaic (PV) pump. Solar pumps may face challenges operating at their full potential during rainy, cloudy and non-sunny days.

Does Nepal have a good water supply system?

Following the establishment of the solar lift and electric pump system with the assistance of the Government of Nepal (GON), people expressed high satisfaction with the improved basic water supply service. Metering connections are present at every public tap stand, and it is observed that there is no water wastage.
