How many planets can one star have?

Estimates are that at least 70 per cent of all stars are accompanied by planets, and since the latter can occur in systems rather than as individuals (think of our own solar system), the number of planets in the Milky Way galaxy is of order one trillion.

Does the Solar System have an anxiety about its reputation?

The solar system has no anxiety about its reputation. Ralph Waldo Emerson (1872). "The Prose Works of Ralph Waldo Emerson: Representative men. English traits. Conduct of life", p.423 Man must at all costs overcome the Earth's gravity and have, in reserve, the space at least of the Solar System. Konstantin Tsiolkovsky (2004).

Do we really have the most beautiful planet in our Solar System?

Earth is the most beautiful planet in our solar system. None other can sustain life like we know it, with blue water, white clouds, and colorful landmasses filled with thriving, beautiful, living things like human beings.

What makes Earth unique in our Solar System?

What makes Earth unique in our Solar System is that none other can sustain life like we know it. None other has blue water and white clouds covering colorful landmasses filled with thriving, beautiful, living things like human beings.
