What is a lihub energy storage system?

The LiHub has a standard one-cabinet-one-system design, each system is completely independently controlled. Multiple cabinets can be connected in parallel to expand the size of the energy storage system, enabling flexible configurations. All-in-one, high-performance energy storage system for various industrial and commercial applications.

What is lihub all-in-one energy storage system?

LiHub All-in-One Industrial and Commercial Energy Storage System is a beautifully designed, turn-key solution energy storage system. Within the IP54 protected cabinet consists of built-in energy storage batteries, PCS inverter, BMS, air-conditioning units, and double layer fire protection system.

What can lihub do?

The LiHub allows remote monitoring of operating status, and early fault warning, and performs benefit analysis. The LiHub can carry out peak shaving and valley filling, demand management, demand response, power capacity expansion, power curtailment mode, emergency backup power, and other modes that can meet many scenarios of applications.
