One way to detect any misbehavior is to estimate the electric power of a PV system using data from meteorological stations or an in-situ integrated weather station to calculate the electric ...

when you hear "energy storage project," you probably picture engineers arguing over spreadsheets. But what if I told you Ljubljana's energy storage initiative could determine ...

Discover how the Ljubljana Photovoltaic Power Plant Energy Storage System is revolutionizing renewable energy storage in Central Europe. This article explores its innovative design, ...

Weather Station for Solar PV For large PV installations, even small relative fluctuations in performance can make a huge difference to overall productivity. That's why meteorological ...

Ljubljana's first energy cooperative in Siska District demonstrates how localized microgrids could work. Participants share stored solar power through blockchain-tracked transactions.

This section describes different types of models for predicting solar radiation on an inclined surface, meteorological stations, and PV systems in Slovenia and various approaches ...
