The selected projects range from large-scale battery systems to industrial thermal storage and new pumped-hydro plants, reflecting both the technological maturity of the sector ...

Galp, in partnership with the startup BeePlanet and BMW, launched a pioneering energy storage system that uses end-of-life electric vehicle batteries to power ultra-fast chargers in Madrid.

The bulk of the EUR814 million (\$956 million) funding envelope will be directed to co-located energy storage projects, with standalone batteries receiving the next largest share.

The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in hybridisation with renewable energy facilities ...

They are now also consolidating around mobile energy storage (i.e., electric vehicles), stationary energy storage, microgrids, and other parts of the grid. In the solar market, consumers are ...

But for engineers, logistics managers, and renewable energy nerds (we say that lovingly), these mobile powerhouses are revolutionizing how we store and transport energy. This article cuts ...
