What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300-3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

Can JPC supply a high power containerised generator unit?

JPC can also supply a high power containerised generator units. Which by widening the ISO container to accommodate a larger generator unit; these larger containerised generator unit can still be lifted into place using standard crane methods with standard locking corner casting positions for road transport.

What is an electrical generator?

Electrical generators are pieces of critical power equipment that provide electricity when power from the power grid is unavailable. Interestingly enough, generators don't actually create electricity.

What is a diesel generator?

Diesel generators are those that are run on diesel, and can typically be divided into two basic parts: a diesel engine and an electrical generator. Diesel generators can be used to provide power to places that are not powered by a power grid or can be used as a backup in case of a power outage.
