What's happening with LNG bunkering in Marseille?

The latest demonstration of the significant investment being made in critical LNG bunkering infrastructure saw TotalEnergies Marine Fuels and its customer, CMA CGM, performing Marseilles' first ship-to-ship Liquefied Natural Gas (LNG) bunkering operation in the Port of Marseille Fos, Southern France.

What is the H2V Marseille Fos project?

The H2V Marseille Fos project marks a significant milestone in the transition to green energy, with a substantial green hydrogen production unit set to be developed at the Port of Marseille Fos.

Is CMA CGM launching a ship-to-containership LNG bunkering operation?

CMA CGM and TotalEnergies have launched its inaugural ship-to-containership Liquefied Natural Gas (LNG) bunkering operation in the Port of Marseille Fos, Southern France. CMA CGM BALI, a 15,000 TEU LNG-powered containership is deployed on the MEX 1 service, connecting Asia and South Europe.

Why is Marseille Fos important?

As a key gateway to the south of Europe, it provides a vital alternative to the ports of Northern Europe. Spanning an area comparable in size to the city of Paris, the Port of Marseille Fos boasts extensive space and infrastructure, making it well-suited for maritime, logistics, and industrial activities.
