How much energy does Mexico need?

To meet its ambitious renewable energy output goals, Mexico will need 4-6 GW of energy storage by 2030. New DAC regulations require renewable projects to incorporate 30% BESS capacity. Energy sovereignty is a highly charged political issue in Mexico and an important driver of Mexico's about face on energy reform.

Can Bess earn money from energy storage and electromobility services?

In late 2022, Chile passed an Energy Storage and Electromobility Law enabling standalone BESS to earn income from energy arbitrage and capacity reserve services.

Is Mexico a Bess hotspot?

Mexico is emerging as a regional BESS hotspot due to new government regulation under President Sheinbaum. Its new Grid Code mandates that all new solar and wind plants must include BESS equal to 30% of generation capacity, with at least 3 hours of storage. Some of the market development highlights include:

As electricity prices surge by 18% annually and solar panel adoption quadruples since 2020, Mexico's energy revolution demands storage solutions. We break down the latest 2025 BESS ...

The Mexico energy storage system market is poised for significant growth in the coming years due to various factors such as increased renewable energy integration, grid modernization ...
