What is a battery rack?

Battery racks for the organisation and safe storage of energy sources. Special battery racks as customised holders for special batteries for the efficient and safe storage of energy sources. Battery trays for holding and protecting batteries, available in various sizes. Here you will find all products in one document for your records.

What is a CIBR battery rack?

Charles Indoor Battery Racks (CIBR) are modular, seismic Zone 4 rated (GR-487 certified) battery rack systems designed to fit the footprint of VRLA batteries from a variety of battery manufacturers or Saft Tel.X Ni-Cd batteries. In addition to several standard configurations, there are also single tray options that can be built on site.

Is a seismic rack safe?

The SEISMIC rack is specially tailored to your battery and therefore space-optimized. Absolutely safe. In a live test, the NUCLEAR Rack successfully withstood an earthquake up to SL3 = 3,4 g. Especially in rough seas: special solutions with hold-down brackets and rubber buffers for ships or offshore platforms.
