What is a solar combiner box?

A solar combiner box is an electrical junction box that houses several wires and cables, joining their connections tightly through different ports of entry. You use it to bind multiple strings of photovoltaic (PV) modules into one standard bus.

What are PV string DC combiner boxes?

PV String DC combiner boxes are key components in PV solar power systems, which are placed between solar modules and the inverter. Available in the following variations:

What is a DC combiner box?

The DC Combiner Box puts PV string monitoring front and center. It enables the system status to be continuously recorded and the string currents and voltages to be measured. Indirect current measurements using Hall-effect technology enable the prevention of power losses and the coupling of surge voltages to the monitoring system.
