How will New Zealand's grid voltage change in 2025?

On the 13th of June 2025, New Zealand's Energy Minister Simon Watts and Building and Construction Minister Chris Penk announced that the range of our country's grid voltage will be expanded. They also announced that the consenting system for installing new solar power systems will be simplified.

Does New Zealand have a rooftop solar system?

The Government is expanding the permitted voltage range for New Zealand's electricity networks and making changes to the building consent process to help increase the uptake of residential solar. New Zealand's residential uptake of rooftop solar is lower than many other countries. In order to shift the tide, the Government is making changes to:

How many solar panels are installed in New Zealand?

In October 2022, Electricity Authority data showed 43,641 solar systems installed across New Zealand, adding up to 240 MW. This makes up an estimated contribution of under 1% of total electricity consumption. Globally, solar PV uptake has increased significantly over the past decade.

How can I maximize solar power output in New Zealand?

Pairing discounted solar panels with smart appliances, energy management systems, or home batteries can help Kiwis make the most out of every ray of sunshine. Best Practices for Solar Panel Installation in New Zealand To maximize solar power output, installers and homeowners should follow these best practices:

Jun 13, 2025 · New voltage limits good for consumers News 13 June 2025 Big news for solar owners and smart energy use. The Government has just announced it will expand the ...

Why Choose the PowerBox2? Built with Victron Energy - Industry-leading performance and smart connectivity with Victron SmartSolar, MultiPlus, and BMV monitoring. More Solar, More Power ...
