---

This research focuses on the development of a novel direct hydrometallurgical nickel sulfate process as an alternative to conventional nickel sulfate production via a nickel ...

According to our latest research, the global Battery-Grade Nickel Sulfate market size reached USD 2.35 billion in 2024, driven by the surging adoption of electric vehicles (EVs) and the ...

Battery grade metal sulfate solutions can be prepared directly from electrolytically produced metal objects, such as cathode plates, when these are subjected to an aqueous leaching solution...

The country's nickel exploitation leans on the promise of moving up the value chain and capturing a significant part of the global battery industry. However, as Indonesia crawls from the ground ...

Recent trends indicate a shift toward high nickel content-based batteries. Therefore, there is a need to understand the existing nickel sulphate datasets used in battery studies. It is ...
