Where is Bergen located?

Bergen is the second largest city in Norway and is located on the west coast of the country. The city is surrounded by mountains and valleys and is therefore also known as the 'Gateway to the Fjords'. The city has developed into an interesting location for industry and goods transport.

What is the largest seaport in Norway?

The largest seaport in Norway - the Port of Oslo - has a modern container terminal and is connected to the road and railway networks. All of these factors make the city very attractive to many companies. Bergen is the second largest city in Norway and is located on the west coast of the country.

Is air freight a good option in Norway?

Then air freight is an excellent option. Norway has several airports that make this transport possible. Including Oslo-Gardermoen International Airport, which has become a key freight hub in Europe. Other airports, such as Bergen Airport and Trondheim Airport, also offer reliable and fast goods transport.

What is the infrastructure of Norway?

Another interesting part of the infrastructure is the Norwegian rail transport. All major cities in the country are connected by rail. Rail transport in Norway plays a slightly less important role than road transport, but many companies use it as an alternative. Especially for the transportation of heavy or bulky goods (special transport).
