What is included in a grid substation?

Completely equipped it contains high voltage GIS, transformer unit, control, protection, cabling and power supply. The independent grid substations up to 420 kV can be installed plug and play and commissioned in days at the location of demand.

What is a prefabricated substation?

Prefabricated substations with up to 420 kV : Siemens Energy provides a large range of prefabricated substations that are equally suited for either temporary or permanent use in challenging grid expansion- and maintenance programs or as emergency response.

What is a 420 kV grid substation?

Fast deployable, independent grid substations up to 420 kV for Transmission System Operators are increasing the availability of energy transmission systems. The substation is designed for road transportation and dimensions of each unit meet local road transportation requirements.

Does Siemens Energy offer a pre-commissioned substation solution?

Depending on customer requirements Siemens Energy can deliver a fully pre-commissioned substation solution equipped with power transformers as well as high- and medium voltage, making it the most cost-effective solution to simplify your on-site schedule. Skid-mounted solutions can be delivered with GIS, AIS and Dead Tank arrangements.
