What are IP cabinets used for?

Perfect for the use in indoor and outdoor areas such as industrial environments, damp and humid spaces, as well as for telecommunication and wide area (FTTx) networks. Our high quality IP cabinet variants protect your sensitive instruments from dust, moisture, dirt, and unauthorised access.

What is a wireless Oil & Gas Communication Network?

Ideally, wireless oil and gas communication networks deliver broadband speeds and form a scalable foundation to securely support multiple applications that increase operational efficiency and safety on one cost-effective physical infrastructure.

How will the oil & gas industry benefit from a common user interface?

To rationalize operations and control costs, tomorrow's Oil & Gas industry will take advantage of common user interfaces for all applications and systems, common network infrastructures, common technologies (Legacy SDH/PDH, Ethernet, IP, MPLS-TP, etc.) and common maintenance systems.

How can high precision locating technology be used in oil & gas fields?

High precision locating technology (such as SIMATIC RTLS) can be used to protect employees in oil or gas fields. The most common applications in the Oil & Gas sector are presented and explained in the following examples (see page 5 et seq.).
