What is battery energy storage systems (Bess)?

Battery Energy Storage Systems (BESS) - Frequently Asked Questions (FAQ's) What are Battery Energy Storage Systems (BESS)? Battery Energy Storage Systems (BESS) are energy retention systems that store and then discharge electricity back into the electricity grid when supply is low or when energy is most expensive.

What is a Bess facility?

BESS facilities are a specific type of energy storage system that store energy using batteries. Considerations for zoning must consider their intended use, preferred location and size.

Should Bess be added to the city of Ottawa's official plan?

The report begins by recognising the complexity and uniqueness of BESS installations, recommending the addition of a new section to the City of Ottawa's development guidelines, known as the Official Plan, specifically aimed at new battery storage facilities.

What is a Bess system?

BESS systems have a range of applications including smaller residential systems, larger commercial systems and public utility and transmission-scale systems similar to those under the LT1 RFP. BESS are also being used to store energy supplied from rooftop or ground mounted solar systems. Who is the Independent Electricity Systems Operator (IESO)?
