Are energy storage systems eligible for the ITC?

Energy storage systems that are charged by the renewable energy system 100% of the time on a yearly basis are eligible to claim the full value of the ITC. These guidelines generally apply to energy storage systems that are installed at the same time as the renewable energy system.

Which energy storage systems are eligible for a 30% ITC credit?

Energy storage systems that are charged by a renewable energy system 75% or more of the time are eligible for a like percentage of the 30% ITC. For example, a storage system that is charged by renewable energy 80% of the time is generally eligible for the 30% ITC multiplied by 80%, which equals a 24% ITC instead of a full 30% credit.

What are the benefits of solar and energy storage?

Bulk storage: These grid-connected storage projects enable increased integration of renewable energy sources while ensuring a resilient and reliable power supply when and where it's needed most. Learn about the benefits of pairing solar and energy storage and incentives available for installing a system at your home.

Do solar photovoltaic cells qualify for ITC?

For example, the PLRs issued to date indicate that solar photovoltaic (PV) cells and energy storage systems need to be in close physical proximity with each other, and owned by the same taxpayer, in order to qualify for the ITC under Section 48.7

On This Page [How It Works](#) [Who Qualifies](#) [Qualified Expenses](#) [Qualified Clean Energy Property](#) [How to Claim The Credit](#) [Related Resources](#) [File Form 5695, Residential Energy Credits](#) with your tax return to claim the credit. You must claim the credit for the tax year when the property is installed, not merely purchased. For additional instructions on how to claim the credit for residential clean energy follow our step-by-step guide. See more on [irs.gov](https://www.irs.gov/b_ans).
