Where are solar panels made?

Our factory is located in Batangas of the Philippines. We own four production lines, two lines of the solar cells and two lines of the solar panels with an annual capacity up to 1GW. We aim to provide our clients with full industrial chain products and service, to meet various needs from them around the world.

Is the Philippines' solar panel industry ready for significant growth?

As we explore the implications of this expansion, it's clear that the Philippines' solar panel industry is ready for significant growth in the region. With an investment of US\$150 million to US\$250 million expected in the coming years, the solar panel manufacturing industry in the Philippines is poised for significant growth.

Who is GoSolar Philippines?

GoSolar Philippines provides high-quality solar panels and installation services for homes and businesses. Generate your own electricity and eliminate your electric bill with our zero-bill solutions. Astron Metal Works Corporation specializes in customized steel fabrication services, which includes the production of solar panel structures.

How many solar panels can a Batangas factory produce?

McHugo said the Batangas factory has a total capacity to produce 150 MW of solar panels. It will need an additional USD5 million to reach the maximum capacity in two years. These Philippine-made, high-tech, and ultralightweight solar panels are exported to the US, Canada, Europe, Middle East, Malaysia, and Indonesia.
