What is a portable ups & how does it work?

This portable UPS is a DC uninterruptible power supply designed to extend your network power and internet availability in the event of electrical failures, while fully protecting all connected loads. It also ensures continuous operation of critical equipment, security devices and emergency lig

Is a ups or a power bank better for home backup?

Losing access to lights, the internet, or charging your devices can disrupt your day. That's why having a reliable power backup system is crucial. Many people wonder whether a UPS (Uninterruptible Power Supply) or a Power Bank is the better option for home backup.

What is the difference between a power bank and ups?

The main advantage of a power bank is its portability, making it ideal for people who need a backup power source when traveling or during short outages, especially for smaller devices. When comparing UPS vs Power Bank, one of the key factors to consider is capacity.

What is a portable power bank?

Small enough to fit in your backpack or laptop bag, this portable power bank is perfect for on-the-go charging when you don't have the convenience of an AC outlet nearby. With dual USB ports, you can charge two devices simultaneously including smartphones, tablets and other USB powered devices.
