How much does a 2MW battery storage system cost?

In total, the cost of a 2MW battery storage system can range from approximately \$1 million to \$1.5 million or more, depending on the factors mentioned above. It is important to note that these are only rough estimates, and the actual cost can vary depending on the specific requirements and characteristics of each project.

What is a battery cabinet?

A battery cabinet houses and protects the batteries that supply stored energy to a UPS system. It ensures that backup power is readily available whenever primary power is interrupted. Battery cabinets can be installed indoors or outdoors and are designed to provide secure, organized, and scalable energy storage for continuous power delivery.

What types of battery cabinets are available?

Tariff Relief. Up to 10% Protection. Battery cabinets from diverse manufacturers APC, Toshiba, CC Power, Eaton, Powerware, Mitsubishi, Narada, and Salicru. We stock new and used battery cabinets in support of our energy storage packages, ups backup systems and rental UPS. Speak to a power expert to match up with your specific requirements.

How much does a battery storage system cost?

The cost of the BMS can account for about 5% to 10% of the total battery storage system cost. For a 2MW system, if we assume a BMS cost ratio of 8%, and the total system cost excluding the BMS is \$800,000 (as calculated for the battery cost above), then the cost of the BMS would be $\$800,000 * 0.08 = \$64,000$.
