What is a mobile photovoltaic system?

That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. This system is realized through the unique combination of innovative and advanced container technology.

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.

What is a solar container?

The Solar container is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest. Panels lay flat on the ground.

How many installers does a solar container need?

At least 3-4 installers and 1 crane operator are needed to put the Solar container into operation within one day.
How many households can one Solar container supply with electricity?

Solar Hybrid Container Price In general, a basic solar trailer (plug-and-play PV only) starts around EUR21,500 for a 12.6 kWp system with 41 kWh battery, while mid-range hybrid containers ...

What Drives Solar Container Costs? Solar container systems - those all-in-one power stations combining photovoltaic panels, batteries, and inverters in shipping containers - have become ...

Flexible, Scalable Design For Efficient 2000kWh 2MWh Energy Storage System. With 1MW Off Grid Solar
