Does France have a storage battery market?

The European residential storage battery market has grown significantly during the energy crisis, but it has remained relatively small in France. Nevertheless, battery manufacturers expect higher demand due to rising electricity prices. From pv magazine France

Which country is promoting the development of residential energy storage?

In terms of residential energy storage, the Polish government has launched Moj PRD 5.0 subsidy program to encourage the development of residential energy storage. Sweden's installed battery storage capacity is expected to grow from 503 MW in 2023 to 3.8 GW in 2030, with high revenue levels in the ancillary services market driving the market growth.

How many battery energy storage systems are there in Europe?

From pv magazine France SolarPower Europe says the number of battery energy storage systems (BESS) in residential buildings throughout Europe jumped from 650,000 installations in 2021 to more than 1 million in 2022. This is a sharp rise, largely driven by jump in energy prices since the start of the war in Ukraine.
