Is solar leasing a good option?

As with any solar financing option, solar leasing comes with its share of pros and cons: As long as your contract is structured competitively, solar leases should reduce your monthly energy costs compared to what you'd pay your utility company.

What is solar leasing & how does it work?

What is solar leasing and how does it work? Solar leasing is a financing option where you pay a monthly fee to use a solar panel system installed on your home, but the solar company owns and maintains the equipment. You benefit from the solar energy produced without the upfront cost of purchasing the system.

Should I buy or lease a solar system?

Solar leasing offers low or no upfront costs, system maintenance by the provider, and predictable monthly payments. Buying provides potential tax incentives, and full ownership, which can increase home value. How much can I expect to potentially save when leasing with a Sunrun Subscription?

How much does a solar lease cost?

Example: A 7kW system estimated to produce 8,500 kWh annually might have a lease payment of \$89 per month. Whether the system produces 600 kWh or 1,100 kWh in a given month, your payment remains \$89. Solar lease agreements typically span 20-25 years and include several important provisions:

Solar and energy storage projects temporarily set aside land and protect it from permanent loss due to industrialization and urbanization. At Arevon, we further take care to safeguard and ...

As the demand for clean energy increases, so too is the demand for suitable land for solar and battery storage development in Virginia. Our firm provides regulatory and transactional ...
