What is a rack uninterruptible power supply (UPS) system?

A rack uninterruptible power supply (UPS) system is designed for use within standard 19-inch IT racks or rack-based enclosures. Rack-based UPS systems must be designed to provide maximum power in very compact packages that include built-in batteries. A rack UPS generally uses from 1U to 12U of vertical rack space.

Why do you need a rack mount ups?

Power failures and electrical disturbances are more than just inconvenient -- they can take down servers, disrupt networks, and cause costly downtime. That's where a UPS, or uninterruptible power supply, comes in. Specifically, a rack mount UPS gives you the power protection you need, right where you need it, without taking up valuable floor space.

How much space does a rack ups use?

A rack UPS generally uses from 1U to 12U of vertical rack space. Most rack UPS systems employ either online (double conversion) or line-interactive power topologies. Each technology has its advantages and each may be necessary for configuring cost-effective power protection, especially in complex systems.

What are Enconnex rack mount uninterruptible power supplies (UPS)?

Enconnex rack mount uninterruptible power supplies (UPS) offer efficient and reliable power protection. Available in line-interactive and online (double-conversion) topologies, lithium-ion (LiFePO4) and lead-acid (VRLA) battery compositions, and various capacities. Enconnex Has Your Back...Up Power
