How much does a solar system cost in San Diego?

Solar power system cost based on your location, roof, power usage, and current local offers. *Prices are shown after applying the 30% federal tax credit. As of Oct 2024, the average cost of solar panels in San Diego is \$2.5 per watt making a typical 6000 watt (6 kW) solar system \$10,500 after claiming the 30% federal solar tax credit now available.

What is the range of solar panel installation costs in San Diego?

Prices range from \$10,030 to \$13,570 for a 5 kW solar panel installation in San Diego, CA. As of August 2024, the average cost is \$2.36/W including installation.

How much do solar panels cost?

This is lower than the average price of residential solar power systems across the United States which is currently \$3.00 per watt. The size of a solar panel system also plays a role in how much the installation will cost. Larger solar installations will typically have a lower cost per watt, because the panels can be purchased at a 'bulk price'.
