Will Saudi Arabia be able to deploy battery energy storage systems by 2030?

According to Saudi Energy Minister Prince Abdulaziz bin Salman, the nation has set a goal of deploying 48GWh of battery energy storage systems by 2030. This ambitious target not only supports Saudi Arabia's energy transition but also injects fresh momentum into the global renewable energy and energy storage markets.

Why is Saudi Arabia launching a battery storage project?

Saudi Arabia aims to generate 50% of its electricity from renewables by 2030. However, renewable energy sources like solar and wind can be unpredictable. The 12.5 GWh battery storage project will solve this issue by storing energy and ensuring a steady power supply. This is very important in Saudi Arabia.

Is a 2gwh battery energy storage system being built in Saudi Arabia?

Battery storage containers at the Bisha project. Image: PowerChina. A 2GWh battery energy storage system (BESS) project has gone into operation in Saudi Arabia, according to the engineering, procurement and construction (EPC) firm which delivered it.

Is South Korea launching a battery energy storage system in Saudi Arabia?

South Korea's Ministry of Trade, Industry and Energy will host a competitive solicitation for battery storage capacity in two locations. A 2GWh battery energy storage system (BESS) project has gone into operation in Saudi Arabia, according to the EPC firm which delivered it.

Jul 19, 2025··China's BYD Energy Storage recently signed a landmark agreement with Saudi Electricity Company (SEC) to deploy a 12.5 GWh battery storage system, the largest grid ...

May 6, 2025··In this article, the top 10 energy storage battery companies in Saudi Arabia in 2025 will be introduced, from basic information to latest ...

Saudi Arabia s new solar container battery
