Are non-space-based power beams included in NASA's SBSP project?

Countries with non-space-based power beaming efforts are not included. The idea of SBSP is not new to NASA, which conducted feasibility studies first in the 1970s (NASA & DoE, 1980) and again in the 1990s (Mankins, A fresh look at space solar power: New architectures, concepts and technologies, 1997).

Could SBSP be the future of electricity?

Proponents claim SBSP could deliver large amounts of electricity at competitive prices and with fewer greenhouse gas (GHG) emissions than terrestrial renewable electricity technologies while accelerating development of the space economy.
