Is a solar energy project in Senegal the biggest in West Africa?

Work on a solar energy and battery storage project in Senegal, touted to be the biggest in West Africa once it goes live, is set to begin next month after an EPC (Engineering, Procurement and Construction) contract for its development was recently signed. The Kolda project will encompass a 60MWp PV solar plant coupled with a 90MWh storage system.

When will a solar power plant be built in Senegal?

"This agreement paves the way for the construction to begin in May 2025, with the deployment of a 60MWp photovoltaic plant coupled with a 90MWh storage system." Voltalia is to supply the PV infrastructure for the solar power plant, which will operate on Senegal's national grid managed by SENELEC.

Is Senegal achieving universal energy access?

With a national electricity access rate of 84%, Senegal is making progress towards universal energy access, yet more than 30% of rural communities remain disconnected from the grid.

What is Axian Energy doing in Senegal?

Last November, Axian Energy confirmed that it closed a EUR84 million (around \$89m) financing deal for the project set to provide clean, reliable energy for more than 230,000 people (or 25,000 households) in Senegal's Kolda in the Casamance region in the south of the country. Axian Energy said the project is scheduled to be completed by 2026.

Each container is equipped with 18 pieces of 465W TOPCon bifacial PV modules, a 10kW off-grid inverter, three 10kWh lithium batteries, and an EV charging station-- collectively generating ...

Aug 12, 2025&ensp;&#0183;&ensp;The project also funded social initiatives, including the provision of solar-powered water pumps, expanded drinking water access for five nearby villages, and technician training
