What is Solar Photovoltaic Glass?

This article explores the classification and applications of solar photovoltaic glass. Photovoltaic glass substrates used in solar cells typically include ultra-thin glass, surface-coated glass, and low-iron (extra-clear) glass.

Why do photovoltaics need solar glass?

Whether on Earth or in space, photovoltaics require technical solar glass for protection from harsh environments, as well as to sustain high transmittance in the visible spectrum of light up to near-infrared that increases the efficiency of the cell while shielding against harmful radiation.

Why should you choose Schott Solar cell cover glass?

Design opportunities are further enhanced by the availability of different coatings. SCHOTT's Solar Cell Cover Glasses are available as two variants, SCHOTT's Solar Glass 0787 and SCHOTT's Solar Glass sphere, each one providing specific technical properties for challenging environments.

Why should you choose Glasstech equipment?

back panels, Glasstech equipment provides reliable, repeatable results at the high throughput you need. Electric Radiant Heater - Solar Features: Continuous flat glass tempering system for processing high transmission (low-iron) cover panel and active (coated) glass, as well as clear glass for PV panels.
