How many solar roof tiles will freesuns produce?

The flexible, automated production allows Freesuns to produce its newly developed matrix shingle roof tiles on a pilot scale before moving into mass production. The production line will manufacture a total of 4,000 solar roof tiles using the matrix shingle technology.

How many solar roof tiles will be made in 2025?

The production line will manufacture a total of 4,000 solar roof tiles using the matrix shingle technology. Since March 2025, the company has produced the first 800 and is currently installing the roof systems into five existing buildings in Switzerland.

How does freesuns make matrix shingle solar roof tiles?

The flexible, automated production allows Swiss project partner Freesuns to produce its newly developed matrix shingle roof tiles on a pilot scale before moving into mass production. Can solar roof tiles improve thermal management?

Also, Alim et al. found that incorporating phase change materials in solar roof tiles can significantly improve their thermal management by reducing peak temperatures (Alim et al., 2020). Therefore insulation properties of roof tiles and the lack of proper airflow for cooling can also affect the overall performance of SRTs.
