What are solar roof tiles?

Just like solar panels, solar roof tiles convert sunlight into electricity, but they're made to look just like traditional roof tiles. Some models are actual roof tiles with integrated solar cells.

Are solar roof tiles worth it?

Solar roof tiles are still capable of producing as much electricity as a traditional solar panel system, but to achieve this you may have to cover your entire roof with them - and this comes with a very hefty price tag.

Are solar panels better than roof tiles?

Solar panels, that is solar panels on slate roofs, are still the better investment overall compared to solar roof tiles. Roof tiles are expensive because you are ultimately installing a new roof, and while they look great, they can be less efficient than solar panels.

Do solar tiles cost more than solar panels?

So once the scaffolding is up, you get better value by filling the roof and generating as much electricity as you can. This also improves the payback period and overall return on investment. Solar tiles do cost more than solar panels, but the principle is the same. The more tiles you install, the more free electricity your roof will produce.
