What is the Shanghai megafactory?

The Shanghai Megafactory mainly produces Megapack, an ultra-large commercial energy storage battery, for the global market. The Megafactory was expected to go into production in the first quarter of 2025, and Megapack production would be as high as 10,000 units per year, with nearly 40 GWh of energy storage, Tesla previously said.

What is Tesla's Shanghai megafactory for energy storage?

The Shanghai Megafactory for energy storage is Tesla's first such facility outside the United States. Construction commenced in the Lin-gang Special Area on May 23 last year, and the factory achieved the milestone of producing its first product just nine months after acquiring the land.

Why is Tesla launching Megapack production in Shanghai?

The launch of Megapack production in Shanghai positions Tesla to capture a larger share of the rapidly growing global energy storage market while strengthening its footprint in China's renewable energy sector.

Why did Tesla build a Gigafactory in Shanghai?

Tesla's construction of its first international energy storage Gigafactory in Shanghai highlights the company's commitment to expanding its influence in the global energy market. This state-of-the-art facility marks a significant stride in Tesla's mission to strengthen its energy storage capabilities, alongside its automotive ambitions.
