What is the global supercapacitors market size?

The market sizing and forecasts are revenue-based (USD Million/Billion), with 2024 as the base year. The global supercapacitors market size was estimated at USD 2.94 billion in 2024 and is predicted to increase from USD 3.45 billion in 2025 to approximately USD 14.74 billion by 2034, expanding at a CAGR of 17.50% from 2025 to 2034.

How much is the supercapacitors market worth in 2025?

The supercapacitors market is valued at USD 0.54 billion in 2025 and is projected to double to USD 1.09 billion by 2030.

Why are supercapacitors not widely used?

Despite their benefits, supercapacitors have several problems that prevent them from being widely utilized. Their reduced energy density in comparison to batteries is one of the primary problems. Supercapacitors usually have an energy density of 5-10 Wh/kg, which limits their use in applications that need long-term energy storage.

How to choose a supercapacitor?

The selection of a proper supercapacitor from a manufacturer depends not only on the application, power, energy requirement, spacing, cost, and the expected life of the device but also on the reviews from previous customers.
