Who makes gensets for reefer containers?

Corporated with Shanghai CIMC Generating Set Co.,Ltd,our team with professionals with nearly 30 years experience of in designing and manufacturing gensets for reefer containers guarantee tight and efficient quality control as well as manufacturing process.

What are the different types of Genset units used for reefer containers?

There are three main types of genset units used for reefer containers: clip-on gensets,under-mount gensets,and on-chassis gensets. Each type serves specific purposes based on transportation needs and logistical requirements. Clip-on gensets are portable units that attach directly to the front or chassis of the reefer container.

What is a genset for a reefer?

Our Clip-On Gensets are built to provide power to Reefers in transit. The Clip-On is fitted to the top corner castings at the front of the container. Our Undermount Gensets are used to provide power for Reefers in transit and are often used as a stationary power source. They can be fitted underneath a chassis frame using four Place Mount hangers.

Why do reefer containers need gensets?

Gensets allow reefer containers to be transported seamlessly via trucks, trains, or ships without compromising refrigeration capabilities. Advanced monitoring systems in modern gensets provide real-time data on temperature fluctuations and fuel usage and address issues proactively before they affect cargo quality.

A reefer generator--short for refrigerated container generator--plays a critical role in the cold chain logistics industry by supplying reliable electrical power to refrigerated shipping ...
