How much damage has the Syrian electricity sector suffered over the war?

In a recent interview, Syrian Minister of Electricity Ghassan al-Zamel detailed the extensive damage that the electricity sector has endured over the thirteen-year war, estimating direct losses at \$40 billion and indirect losses exceeding \$80 billion.

How many megawatts does Syria need?

Al-Bashir said Syria's infrastructure that has been repaired can provide 5,000 megawatts, about half the country's needs, but fuel and gas shortages have hampered generation. With the sanctions lifted, that supply could come in soon.

What is Syria's Energy Plan?

The plan will look at Syria's projected energy demand and determine how much of it can come from renewable sources.

How much solar energy will Syria have by 2030?

The Syrian Minister of Electricity unveiled an ambitious plan to introduce up to 2,500 megawatts of solar energy and 1,500 megawatts of wind power by 2030, alongside the installation of 1.2 million solar water heaters. However, Syria's complex economic conditions present a major obstacle to achieving these targets.
