What is the 'Green Energy Green Network for Thais' project?

The 'Green Energy Green Network for THAIs' project aims to deliver solar-generated electricity to communities this year, as well as install solar-powered base stations to create digital network systems in five remote highlands, the companies said.

What should Thailand do for 5G and 5G-A development?

It is therefore important for Thailand to maintain momentum and prioritise the following actions for 5G and 5G-A development: -- Make at least 300 MHz of spectrum available in the globally harmonised 3.5 GHz band as soon as practicable. Avoid unnecessarily large guard band between mobile and fixed satellite service (FSS).

Where in Thailand has electricity and telecommunications infrastructure been installed?

Currently, two pilot villages, Ban Dok Mai Sod and Moko Poke, in Tak province, Thailand's northwest region, have successfully installed electricity and telecommunications infrastructure.

When will 5G technology be implemented in Thailand?

The roadmap mentions the development of 5G technology "and beyond", and while the 2-Year Action Plan for Promoting the Adoption of 5G Technology in Thailand (2021-2022) has already been announced, phase 2 of the plan (2023-2027) remains under development.³⁷ It is expected to be completed by the end of 2024.³⁸ 33. N. B92T)0C(1 .
