What is a complete EPC for 5 MW solar farm power plant?

It is our pleasure to submit this proposal for the complete EPC for 5 MW solar farm power plant. Plant will consist mainly of solar panels and a number of electric equipments for voltage conversion to make suitable for national grid distribution. The estimated required area for the plant is 80,000 to 90,000 m².

What is the scope of supply for a 5 MW solar plant?

The estimated required area for the plant is 80,000 to 90,000 m². The scope of supply will be the complete supply of solar panels and equipments for 5 MW power generation. Complete supply of solar panels and equipments for 5 MW power generation. Installation of all panels and equipments at site.

What is the scope of supply for 5 MW power generation?

The scope of supply will be the complete supply of solar panels and equipments for 5 MW power generation. Complete supply of solar panels and equipments for 5 MW power generation. Installation of all panels and equipments at site. The period for completion of the plant shall be 12 months.

How long will it take to complete a 5 MW solar plant?

Complete supply of solar panels and equipments for 5 MW power generation. Installation of all panels and equipments at site. The period for completion of the plant shall be 12 months. The origin of all equipment and materials will be from Banking and Engineering. 9. Payment Terms We hope that this offer is acceptable for you.

The enclosed technical template language is intended to provide only example language for agencies to consider in the process of assembling a solicitation and ultimately a contract for ...

Dated, valid Take Over Certificate(s) (TOCs) for the Solar PV Facility or TOCs for each of the PV modules and inverters comprising in aggregate not less than 80% of the Installed Capacity ...
