Will Türkiye's battery and storage power plants be approved next year?

However, Usta noted that despite draft regulations, the legal framework for battery and storage power plants is still evolving. The first approvals are expected next year. Türkiye's battery imports remained steady at around \$1.1 billion, similar to last year.

Why is Türkiye a key player in energy storage?

As global investments in energy storage systems continue to grow, Türkiye has positioned itself as a key player, with two cell production facilities and nearly 100 lithium-ion battery production factories of various scales actively operating across the country.

What's happening in Türkiye's lithium ion battery sector?

Bank of lithium ion batteries at the University of California San Diego Center for Energy Research in La Jolla, California, U.S. (AFP Photo) Investments in Türkiye's battery sector surpassed \$1 billion this year, driven by incentives and regulations aimed at achieving an 80-gigawatt-hour storage target by 2030.

Where is Turkey's first solar power plant located?

In 2018, Turkey's first large-scale battery plant was established in Manisa, integrated with a wind power station. During the following year, Turkey's first grid-connected solar energy and storage facility came into operation in Konya, showcasing simultaneous solar energy generation and battery storage.

These initiatives demonstrate a commitment to addressing energy challenges and advancing sustainability in the renewable energy sector. Turkey is aligning with the global trend of grid ...

EVE Energy collaborates with Türkiye's Aksa Power Generation at Solarex Istanbul 2025, presenting high-efficiency energy storage systems to advance renewable integration ...
