What makes Türkiye a great drone company?

With NATO compatibility and cross-domain warfare expertise, Türkiye provides not only UAVs but also a complete doctrine in AI-assisted 5<sup>th</sup>-generation multidomain warfare. Today, Türkiye holds 65% of the global drone market, mostly through products launched by Baykar and the Turkish Aerospace Industries (TAI). Figure 7: TCG Anadolu LHD

How many facility types are there in drone delivery problems?

In delivery problems with only drones, we identify five facility types. (1) A drone base (DB) is a location that provides the following functions: L,U,C,DF,AF,S,F. This is fundamentally the starting point of drone trips, and in a simple delivery setting the package is loaded on the drone at the drone base.

Does drone delivery have a facility location problem?

This study presents a comprehensive literature survey on facility location problems for drone (uncrewed vehicle) delivery, where either (i) drones are the only vehicles, or (ii) drones and other vehicles (e.g., trucks) work together for delivery, but drones do not ride in or on the other vehicles.

Where are Turkish drones used?

Currently, Turkish drones are being used in Europe (e.g. Poland and Ukraine), Africa (e.g. Niger, Ethiopia, Somalia, Libya, and Togo), the Middle East (e.g. Qatar, UAE), and Asia (e.g. Kyrgyzstan, Azerbaijan, and Pakistan).
