-----  
What is the peak electricity demand in Uganda?

The peak electricity demand in Uganda is approximately 650 MW. Access to electricity is currently 28%, with total installed generation capacity at 1182 MW.

How much does electricity cost in Uganda?

Uganda's power tariffs are set on a quarterly basis, and the average tariff to consumers is \$0.19/kWh (\$0.09/kWh for large industrial users), with the first 15 units of power subsidized. Umeme Co. Ltd. is the largest energy distributor in Uganda, distributing 93% of all electricity in the country.

What is Uganda's biggest power project?

The Karuma hydroelectric dam, upstream of Ayago and due to be completed early this year by China's Synohydro Corporation, is currently Uganda's largest power project. The ERA would also conduct its own due diligence on POWERCHINA International to ascertain whether it had the financial and technical capacity to execute the project, Wandera said.

What is Uganda's largest hydropower project?

Uganda's largest hydropower project, the 600 MW Karuma Hydro Power Dam is slated to come fully online by the end of 2023, after over four years of delays. The addition of the Karuma Hydro Power Dam is projected to boost Uganda's total capacity by 44% and leave potentially over 1000 MW of excess power generation capacity.

Let's be honest - when you hear "energy storage project," your brain might start drafting a nap invitation. But stick with me! Uganda's latest push in energy storage isn't just ...

The project directly supports the goals of Vision 2040 and Uganda's National Energy Policy 2023, which prioritizes universal access to affordable, reliable electricity for all Ugandans.
