What is an uninterruptible power supply (UPS)?

Uninterruptible Power Supply (UPS) |Schneider Electric Hong Kong,China. An Uninterruptible Power Supply system provides emergency power when the main source fails,using batteries to ensure a continuous supply. It conditions incoming power,protecting equipment from fluctuations. We offer various UPS power supply types for different needs.

How do I choose an uninterruptible power supply?

To select the right uninterruptible power supply (UPS),calculate the average power required for all connected appliances. For instance,a 350-500 VA capacity is suitable for an LCD monitor or a regular PC.

Why should you buy a Fuji Electric UPS system?

Fuji Electric's high-efficiency UPS systems help to protect critical customer systems and data from power troubles while at the same time helping to improve the global environment by reducing CO2 emissions. Japan China Asia Icon means main region for sale. In case of other regions, please contact us.

Why do you need a 3-phase UPS system?

It also serves as a reliable battery backup. A 3-phase UPS system is crucial in data centres, edge computing, and industrial applications where uptime and data integrity are vital. It protects servers, storage systems, networking equipment from power quality issues.
