Is Uruguay a net importer of energy?

Once a net importer of energy, Uruguay now exports its surplus energy to neighbouring Brazil and Argentina. In less than two decades, Uruguay broke free of its dependence on oil imports and carbon emitting power generation, transitioning to renewable energy that is owned by the state but with infrastructure paid for by private investment.

Is Uruguay a repeatable framework of energy sovereignty for developing countries?

Ramírez Mendizábal believes so. Uruguay's former national director of energy in the Ministry of Industry, Energy and Mining, who was the impetus for the country's shift away from dirty fuels, has been promoting the country's success as a repeatable framework of energy sovereignty for developing countries.

Why did Uruguay start using wind turbines?

Avoiding nuclear power entirely, Uruguay first embraced wind turbines as a source of cheap, reliable power; providing 40% of the country's capacity in less than a decade.
