What is a solar powered shipping container?

At SCS Australia, we create solar powered shipping containers that combine renewable energy technology with the strength and mobility of a shipping container. These self-sufficient units are ideal for powering off-grid operations, mobile businesses, events, and remote projects--all while reducing carbon footprint and cutting energy costs.

Do Victorians use distributed energy resources?

Many Victorians use distributed energy resources to generate, store, manage and sell their energy. This includes solar panels, home batteries, electric vehicles and controllable air conditioners. The use of distributed energy resources is increasing. It is expected that: by the mid-2030s, electric vehicle use will increase by more than 1600%.

What are Victoria's current energy subsidies?

Current subsidies include: Harnessing Victoria's distributed energy resources shows how we will support this shift to distributed energy resources. By helping householders and businesses save money through control of their energy. Energy affordability, sustainability and reliability remain top priorities for the government through this transition.

What are the advantages of a container roof solar system?

1. Integrated Solar Array High-efficiency solar panels installed on the container roof or fold-out frames.
2. Battery Energy Storage Lithium-ion or deep-cycle batteries store energy for use day or night.
3. Inverter & Control Systems Converts solar power to usable electricity with smart monitoring.
4. Weatherproof & Secure
