What is Victoria's 'largest' energy project?

The Mortlake Energy Hub becomes another large-scale energy project to have been fast-tracked through the Victoria government's new scheme. As covered by our sister site Energy-Storage.news in late August, AC Energy saw its 350MW/700MWh Joel Joel project fast-tracked, in what will be the state's "largest" BESS project.

What is the Victorian big battery?

The Victorian Big Battery will contribute to the modernisation of the Victorian electricity network and will be instrumental in helping the State reach its target of 50% renewables by 2030. Independent analysis predicts that for every \$1 invested the battery will deliver \$2.40 in benefits to Victorian households and businesses.

Can large-scale battery storage revolutionize energy systems?

The deployment of Tesla's Megapacks in Victoria, Australia, represents a pivotal step towards achieving a sustainably powered future. With the capacity to power hundreds of thousands of homes, this initiative demonstrates the significant potential of large-scale battery storage to revolutionize energy systems.

Where is the Victorian big battery located?

The Victorian Big Battery is located next to AusNet Services' existing Moorabool Terminal Station, approximately 13km northwest of Geelong. The site was chosen to allow the battery to connect into the existing high voltage transmission hub which means the power can be sent quickly to where it is needed.

Compared to stationary batteries and other energy storage systems, their mobility provides operational flexibility to support geo-graphically dispersed loads across an outage area. This ...

Our journey in storage began in Australia in 2015 and we now have over half a gigawatt of storage operating across 3 continents. We are convinced that large-scale battery storage is a vital ...
