What will Victoria do about coal-fired power stations?

A balance of renewable energy generation and storage will be required to replace retiring coal-fired power stations and ensure Victoria's electricity system is affordable, reliable, safe, and sustainable. Actions include: Building energy storage- like the Victorian Big Battery - to help provide reliable renewable energy throughout the transition.

What is our plan for Victoria's Electricity future?

Cheaper, Cleaner, Renewable: Our Plan for Victoria's Electricity Future outlines the actions we are taking to ensure our state achieves its renewable energy targets. The plan is built on 4 pillars: Enabling the renewables big build. Empowering households and businesses to lower energy bills. Managing the transition away from fossil fuels.

What is Victoria's energy future?

Enabling the renewables big build. Empowering households and businesses to lower energy bills. Managing the transition away from fossil fuels. Creating jobs, skills and supply chains. Cheaper, Cleaner, Renewable: Our Plan for Victoria's Electricity Future highlights investment opportunities for the private sector to partner with us through to 2035.

How can Victoria achieve a successful electricity transition?

For a successful electricity transition, it is essential to skill, up-skill and train Victoria's energy workforce, and have a supply chain that meets our growing energy sector needs. Actions include: Working with key stakeholders to strengthen local renewable electricity supply chains.
