What is a 60kW Solar System?

The 60kW commercial Solar Power System is aimed at the medium to large commercial sector with high energy consumption, and is the perfect way to cut your electricity bills, reduce your carbon footprint and boost your profits. What's in a typical 60kW Solar System? How much power does a 60kW Solar System produce?

How much power does a 60kW solar system generate?

The actual number will vary from day to day as it depends by the average sunlight in your area, the weather, and the placement of your Solar Panels. Over its 25-year lifespan, a 60kW Solar System can generate approximately \$624,150 of power based on \$.30c per kw. On a yearly basis, a 60kW commercial Solar System can generate approximately \$24,966.

Why should you use solar battery storage in New Zealand?

With climate change causing more extreme weather events like cyclones and flooding, power outages are becoming more common in New Zealand. During an outage, a Solar Battery Storage can provide you with a reliable backup power supply, allowing you to maintain your business as usual.

Why should you choose a solar storage container?

Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy. Lower energy/maintenance costs ensure operational savings.
