Will energy storage grow beyond 215 GW by 2030?

LCP Delta and Energy Storage Europe believe the energy storage industry is only just getting started and will continue to make a substantial contribution to Europe's energy transition. According to their analysis, energy storage will grow beyond 215 GW by 2030- with battery storage alone exceeding 160 GW.

Will Europe reach 100 GW of energy storage?

The EU, UK, Norway, and Switzerland together are expected to reach 100 GW of installed energy storage later this month, according to new analysis launched on Wednesday by LCP Delta and Energy Storage Europe. Since 2020, Europe's energy storage sector has grown rapidly, with different technologies progressing at varying speeds.

How has Europe's energy storage sector changed since 2020?

Since 2020, Europe's energy storage sector has grown rapidly, with different technologies progressing at varying speeds. Pumped hydro remains the largest contributor, accounting for 50.6 GW of installed capacity, including 500 MW added this year in Belgium and Austria.

What is the European energy storage inventory?

A new interactive platform delivers real-time clean energy storage insights as Europe shifts toward sustainable energy sources. Energy storage helps to balance supply and demand. The European Energy Storage Inventory is the first of its kind at European level to show all forms of clean energy storage solutions.

May 7, 2025 · Utility-scale projects are expected to dominate 2025 installations as home batteries drop to 33 percent of the market, with commercial and industrial (C& I) storage seeing modest ...

Nov 19, 2025 · A new analysis from LCP Delta and Energy Storage Europe shows that pumped hydro storage holds the largest share of installed capacity at 50.6 GW, with battery energy ...

May 7, 2025 · The European Market Outlook for Battery Storage 2025-2029 analyses the state of battery energy storage systems (BESS) across Europe, based on data up to 2024 and ...

Oct 9, 2025 · This report explores both the contracted and merchant revenue landscapes of energy storage projects in Europe, mapping out viable routes to market and assessing existing ...

10 hours ago · Europe's battery storage sector is entering a period of rapid scale-up, with annual deployments set to climb from 11 GW in 2024 to 16 GW in 2025, a 45% year-over-year ...

2 days ago · the European Grids Package 10 December 2025 -- Today, the European Commission published the Grids Package, addressing critical bottlenecks in grid connections, ...

May 7, 2025 · Utility-scale projects are expected to dominate 2025 installations as home batteries drop to 33 percent of the market, with ...

Dec 1, 2025 · Spain's Institute for the Diversification and Saving of Energy confirmed EUR827 million (\$961.4 million) in European Regional Development Fund co-financing for 133 energy-storage ...

Jun 26, 2025 · Several ambitious energy storage projects are underway across Europe: Earba Storage Project, Scotland: A proposed pumped-storage hydroelectricity scheme with a ...

Mar 20, 2025 · A new interactive platform delivers real-time clean energy storage insights as Europe shifts toward sustainable energy sources.

Nov 26, 2025 · Projects reaching FID in 2024 and 2025 include Stockholm Exergi's BECCS facility in Sweden, Hafslund Oslo Celsio's Klemetsrud waste-to-energy capture project in ...
