Will lignite mine be phased out in North Macedonia?

According to the Energy Strategy it is phased out in all three scenarios. It is being replaced by a 120 MW of solar photovoltaics on top of the now depleted lignite mine. North Macedonia adopted its first National Energy and Climate Plan (NECP) in June 2022.

What is North Macedonia based on?

North Macedonia relies predominantly on fossil fuels (low-grade lignite and gas) and hydropower, and has for many years been dependent on the electricity import. In 2023, imports finally decreased to a negligible level following a rapid increase in solar capacity.

When will North Macedonia's NECP come out?

North Macedonia adopted its first National Energy and Climate Plan (NECP) in June 2022. It follows the more progressive scenarios from the Energy Strategy in its coal phase-out timeline, with Oslomej being decommissioned in 2021 and Bitola in 2027. However, in the introduction it also says that the timeline may slip to 2029.

Does North Macedonia have a wind farm?

North Macedonia has a 36.8 MW wind farm at Bogdanci and has received EU and KfW financing to expand it. It was the first country in the Western Balkan region to put into operation a sizeable wind facility. Its second wind farm, the 36-MW Bogoslovec, was officially opened in mid-2024.

How to achieve energy storage power in electric heavy truck battery swap stations This research systematically addresses these challenges by delving into charge scheduling methodologies ...

May 5, 2025 · In any case, interested parties for investing in battery energy storage systems in North Macedonia should continue to closely monitor the developments in the country's energy ...

What are the energy storage and swap stations in Macedonia
