-----

With regions like Lombardy leading at 1,454 MWh of deployed storage, the country isn't just adopting batteries--it's rewriting Europe's energy playbook. But why should you care?

Energy in Italy comes mostly from fossil fuels. Among the most used resources are petroleum (mostly used for the transport sector), natural gas (used for electric energy production and heating), coal and renewables. Italy has few energy resources, and most supplies are imported. An important share of its electricity is imported, mainly from Switzerland and France

Rome - July 4, 2023 - Matrix Renewables ("Matrix"), the TPG Rise-backed global renewable energy platform, today announced that it has started a partnership with Gravel A through a ...
